## CMS guidelines for student documentation, updated.

100.1.1 - Evaluation and Management (E/M) Services (Rev. 3971, Issued: 02- 02- 18, Effective: 01-01-18, Implementation: 03- 05-18) B. E/M Service Documentation Provided By Students Any contribution and participation of a student to the performance of a billable service (other than the review of systems and/or past family/social history which are not separately billable, but are taken as part of an E/M

service) must be performed in the physical presence of a teaching physician or physical presence of a resident in a service meeting the requirements set forth in this section for teaching physician billing.

*Students may document services in the medical record. However, the teaching physician must verify in the medical record all student documentation or findings, including history, physical exam and/or medical decision making. The teaching physician must personally perform (or re-perform) the physical exam and medical decision making activities of the E/M service being billed, but may verify any student documentation of them in the medical record, rather than re-documenting this work.*
