

# Changing the World, One Medical Student at a Time

## CORD Academic Assembly 2018

Sunday, April 22, 2018

### Speakers:

Sarah Crockett, MD, Geisel School of Medicine at Dartmouth

Mario Trabulsky, MD, University of Vermont Medical Center

### Overview:

Medical student advising and mentoring are critical roles of Emergency Medicine Clerkship Directors and educators. Effective mentorship can have the power to influence students' lives for good far beyond academic endeavors and the application process. Often we are involved in some of the most crucial decisions of their lives that will likely affect not only the student, but their friends and families and the future communities that they will serve. The purpose of this session is to share evidence based best practice recommendations in student mentoring and to hear inspiring stories that will help us all to be great mentors to undergraduate medical students.

### Objectives:

At the conclusion of this activity, participants will be able to:

- 1) Identify mentoring practices that make a meaningful impact on students' lives.
- 2) Develop tools to identify individual student needs both personal and academic.
- 3) Develop the skills to create a personalized mentoring program to help each student achieve their full potential.
