- EMATCH- Lucienne Lutfy
  - Reassurance Tool
    - For years we have been batting around developing a competitiveness tool for applicants.
    - Unfortunately there are so many attributes that affect competitiveness making it difficult to design a tool that would be predictive.
    - Last year Jamie Shandro had the idea to develop the "PERC" rule for applying - rather than help them assess their competitiveness we tell them what to be worried about and reassure.
  - Present prototype
    - Continuing with the PE theme we split red flags into minor and major risks.
    - Each of these comes from the NRMP program directors survey and charting the outcomes in the match.
    - They are graded from 1 to 5 - 5 being the toughest to overcome.

  - Discuss validation
    - To validate this tool we developed a redcap survey with a pre & post questions asking:
    - How many red flags do you think you have
    - How competitive are you
    - How many applications do you plan on submitting
    - When applicants identify they have a red flag they get pushed information to better understand it including:
    - Program director survey figure, specific importance factors and %programs citing the red flag, and charts for %program considering applicant types.
    - They also have embedded links to EMRA match, AAMC, and CORD ASC EM advising resources.
    - Applicants are continually encouraged to seek advise from an advisor and given stategies to mitigate their red flag per ASC EM recommendations.
    - Those who do not identify with an individual red flag are given reassurance and directed to ASC EM applying guides AAMC apply smarter and EMRA Match
    - Applicants get a summary of their responses and after the post test are asked permission to be recontacted.
    - Those who consent to recontacted will be asked their match/unmatched result so that these can be correlated to their answers to the red flags.
    - We hope this will allow us to show an associated match rate with each red flag.

- EMRA Match additions- Zach Jarou

- Demo new features & update profiles

Creating Your **EMRA** Match Profile

emra.org/match/clerkship
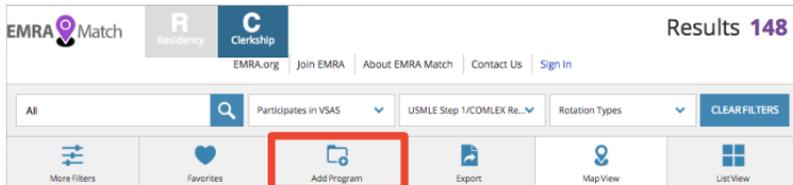

Updating Your **EMRA** Match Profile
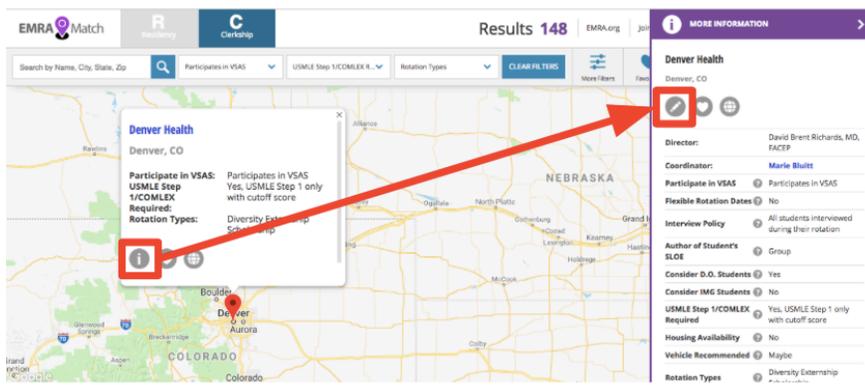

- Code of Conduct for applicants and programs - Doug Franzen
  - XX% PD agreed to this conduct code
  - EMRA sticker (PD only through update form on EMRA Match or survey monkey get answer send list of programs that agree to EMRA Match)
  - Students to inform us if programs not abiding by code

- VSAS - Lead Mike Kiemeney
  - Present VSAS survey results & survey for slots
  - Discussion transparency

- SLOE adjustments- Kendra Parekh
  - eSLOE Adjustments: Need or Want?
  - Evolution of Purpose

- Painting a picture of the applicant: Are thirds the best representation of performance, potential, and fit
- Balancing confidentiality and transparency: Impact of eSLOE transparency (or lack of transparency) on student and advisor assessment of competitiveness and subsequent application strategies
