The Core Content Task Force II created and endorsed the 2001 Model of the Clinical Practice of Emergency Medicine (EM Model) as published in the June 2001 Annals of Emergency Medicine and Academic Emergency Medicine.

The 2013 EM Model Review Task Force conducted the fifth review of the EM Model. Their work is built on the original 2001 EM Model and the subsequent four revisions. The 2013 EM Model is published in May 2014 *Academic Emergency Medicine* online only.

All changes that resulted from the 2013 EM Model Review Task Force are summarized in Figure 1.

#### Preamble of the Core Content Task Force II, Adapted for the 2013 EM Model

In 1975, the American College of Emergency Physicians and the University Association for Emergency Medicine (now the Society for Academic Emergency Medicine; SAEM) conducted a practice analysis of the emerging field of Emergency Medicine. This work resulted in the development of the Core Content of Emergency Medicine, a listing of common conditions, symptoms, and diseases seen and evaluated in emergency departments. The Core Content listing was subsequently revised four times, expanding from 5 to 20 pages. However, none of these revisions had the benefit of empirical analysis of the developing specialty but relied solely upon expert opinion.

#### 2013 EM Model Review Task Force

Francis L. Counselman, M.D., Chair Marc A Borenstein, M.D. Carey D. Chisholm, M.D. Michael L. Epter, D.O. Sorabh Khandelwal, M.D. Chadd K. Kraus, D.O., MPH Samuel D. Luber, M.D., MPH Catherine A. Marco, M.D. Susan B. Promes, M.D. Gillian Schmitz, M.D.

# 2005 EM Model Review Task Force

Harold A. Thomas, M.D., Chair Louis S. Binder, M.D. Dane M. Chapman, M.D., Ph.D. David A. Kramer, M.D. Joseph LaMantia, M.D. Debra G. Perina, M.D. Philip H. Shayne, M.D. David P. Sklar, M.D. Camie J. Sorensen, M.D., M.P.H.

#### 2011 EM Model Review Task Force

Debra G. Perina, M.D., Chair Patrick Brunett, M.D David A. Caro, M.D. Douglas M. Char, M.D. Carey D. Chisholm, M.D. Francis L. Counselman, M.D. Jonathan Heidt, M.D. Samuel Keim, M.D., MS O. John Ma, M.D.

# 2003 EM Model Review Task Force

Robert S. Hockberger, M.D., Chair Louis S. Binder, M.D. Carey D. Chisholm, M.D. Jeremy T. Cushman, M.D. Stephen R. Hayden, M.D. David P. Sklar, M.D. Susan A. Stern, M.D. Robert W. Strauss, M.D. Harold A. Thomas, M.D. Diana R. Viravec, M.D.

#### 2009 EM Model Review Task Force

Debra G. Perina, M.D., Chair Michael S. Beeson, M.D Douglas M. Char, M.D. Francis L. Counselman, M.D. Samuel Keim, M.D., MS Douglas L. McGee, D.O. Carlo Rosen, M.D. Peter Sokolove, M.D. Steve Tantama, M.D.

#### Core Content Task Force II

Robert S. Hockberger, M.D., Chair Louis S. Binder, M.D. Mylissa A. Graber, M.D. Gwendolyn L. Hoffman, M.D. Debra G. Perina, M.D. Sandra M. Schneider, M.D. David P. Sklar, M.D. Robert W. Strauss, M.D. Diana R. Viravec, M.D.

#### 2007 EM Model Review Task Force

Harold A. Thomas, M.D., Chair Michael S. Beeson, M.D Louis S. Binder, M.D. Patrick H. Brunett, M.D. Merle A. Carter, M.D. Carey D. Chisholm, M.D. Douglas L. McGee, D.O. Debra G. Perina, M.D. Michael J. Tocci, M.D.

#### Advisory Panel to the Task Force

William J. Koenig, M.D., Chair James J. Augustine, M.D. William P. Burdick, M.D. Wilma V. Henderson, M.D. Linda L. Lawrence, M.D. David B. Levy, D.O. Jane McCall, M.D. Michael A. Parnell, M.D. Kent T. Shoji, M.D. Following the 1997 revision of the Core Content listing, the contributing organizations felt that the list had become complex and unwieldy, and subsequently agreed to address this issue by commissioning a task force to re-evaluate the Core Content listing and the process for revising the list. As part of its final set of recommendations, the Core Content Task Force recommended that the specialty undertake a practice analysis of the clinical practice of Emergency Medicine. Results of a practice analysis would provide an empirical foundation for content experts to develop a core document that would represent the needs of the specialty.

Following the completion of its mission, the Core Content Task Force recommended commissioning another task force that would be charged with the oversight of a practice analysis of the specialty - Core Content Task Force II.

The practice analysis relied upon both empirical data and the advice of several expert panels and resulted in *The Model of the Clinical Practice of Emergency Medicine* (EM Model). The EM Model resulted from the need for a more integrated and representative presentation of the Core Content of Emergency Medicine. It was created through the collaboration of six organizations:

- American Board of Emergency Medicine (ABEM)
- American College of Emergency Physicians (ACEP)
- Council of Emergency Medicine Residency Directors (CORD)
- Emergency Medicine Residents' Association (EMRA)
- Residency Review Committee for Emergency Medicine (RRC-EM)
- Society for Academic Emergency Medicine (SAEM)

As requested by Core Content Task Force II, the six collaborating organizations reviewed the 2001 EM Model in 2002-2003 and developed a small list of proposed changes to the document. The changes were reviewed and considered by 10 representatives from the organizations, i.e., the 2003 EM Model Review Task Force. The Task Force's recommendations were approved by the collaborating organizations and were incorporated into the EM Model. The work of the Task Force was published in the June 2005 *Annals of Emergency Medicine* and *Academic Emergency Medicine*.

The six collaborating organizations reviewed the 2002-2003 EM Model in 2005 and developed a small list of proposed changes to the document. The changes were reviewed and considered by nine representatives from the organizations, i.e., the 2005 EM Model Review Task Force. The Task Force's recommendations were approved by the collaborating organizations and were incorporated into the EM Model. The work of the Task Force was published in the October 2006 *Academic Emergency Medicine* and December 2006 *Annals of Emergency Medicine*.

The next regular review of the EM Model occurred in 2007. The 2007 EM Model Review Task Force recommendations were approved by the collaborating organizations and were incorporated into the EM Model. The work of the Task Force was published in the August 2008 *Academic Emergency Medicine* and online-only in the August 2008 *Annals of Emergency Medicine*.

The fourth review of the EM Model occurred in 2009. The 2009 EM Model Review Task Force recommendations were approved by the collaborating organizations and were incorporated into the EM Model. The work of the Task Force was published in the January 2011 *Academic Emergency Medicine* and online-only in *Annals of Emergency Medicine*.

The fifth review of the EM Model occurred in 2011. The 2011 EM Model Review Task Force recommendations were approved by the collaborating organizations and were incorporated into the EM Model. The work of the Task Force was published online-only in the July 2012 *Academic Emergency Medicine*.

The sixth review of the EM Model occurred in 2013, and a seventh collaborating organization, the American Academy of Emergency Medicine was added. The 2013 EM Model Review Task Force recommendations were approved by the collaborating organizations and are incorporated into this document.

There are three components to the EM Model: 1) an assessment of patient acuity; 2) a description of the tasks that must be performed to provide appropriate emergency medical care; and 3) a listing of medical knowledge, patient care, and procedural skills. Together these three components describe the clinical practice of Emergency Medicine (EM) and differentiate it from the clinical practice of other specialties. The EM Model represents essential information and skills necessary for the clinical practice of EM by board-certified emergency physicians.

Patients often present to the emergency department with signs and symptoms rather than a known disease or disorder. Therefore, an emergency physician's approach to patient care begins with the recognition of patterns in the patient's presentation that point to a specific diagnosis or diagnoses. Pattern recognition is both the hallmark and cornerstone of the clinical practice of EM, guiding the diagnostic tests and therapeutic interventions during the entire patient encounter.

The Accreditation Council for Graduate Medical Education (ACGME) is implementing the ACGME Outcome Project to assure that physicians are appropriately trained in the knowledge and skills of their specialties. The ACGME derived six general (core) competencies thought to be essential for any practicing physician: patient care, medical knowledge, practice-based learning and improvement, interpersonal and communication skills, professionalism, and systems-based practice. The six general competencies are an integral part of the practice of Emergency Medicine and are embedded into the EM Model. To incorporate these competencies into the specialty of EM, an Emergency Medicine Competency Task Force demonstrated how these competencies are integrated into the EM Model. The 2013 revisions provide further alignment between the EM Model and the ACGME six core competencies.

The EM Model is designed for use as the core document for the specialty. It will provide the foundation for developing future medical school and residency curricula, certification examination specifications, continuing education objectives, research agendas, residency program review requirements, and other documents necessary for the functional operation of the specialty. In conjunction with the EM Model, these six core competencies construct a framework for evaluation of physician performance and curriculum design to further refine and improve the education and training of competent emergency physicians.

#### Figure 1

#### **Summary of 2013 EM Model Review Task Force Changes**

Listed below are the changes approved by the seven collaborating organizations.

#### Changes to Table 1. Matrix of physician tasks by patient acuity

The physician task of Professional and legal issues was separated into two separate physician tasks.

The physician task of Mass casualty/Disaster management was added.

#### Changes to Table 3. Physician task definitions

 The physician task of Professional and legal issues was separated into the following two physician tasks:

Professional issues: Understand and apply principles of professionalism and ethics pertinent to patient management.

Legal issues: Understand and apply legal concepts pertinent to the practice of EM.

• Added "and appropriate" to the physician task of Documentation, to read as follows:

Documentation: Communicate patient care information in a concise and appropriate manner that facilitates quality care and coding.

• Deleted "have familiarity with disaster management" from the physician task of Team management, to read as follows:

Team Management: Coordinate, educate, or supervise members of the patient management team and utilize appropriate hospital resources.

Added the following new physician task:

Mass casualty/Disaster management: Understand and apply the principles of disaster and mass casualty management including preparedness, triage, mitigation, response, and recovery.

# Changes to Table 4. Medical Knowledge, Patient Care, and Procedural Skills

Location	Description of Change
1.0	This category underwent revision and extensive reordering. The changes are too numerous to document using this format.
2.2.1.2	Added Viral esophagitis (Emergent, Lower)
2.11	Deleted acuities (Critical, Emergent, Lower) from this line
2.11.1	Added Asplenism (Emergent, Lower)
2.11.2	Added Splenomegaly (Lower)
2.11.3	Added Vascular insufficiency/Infarction (Critical, Emergent, Lower)
3.1.1	Changed SIDS (See 1.1.34) to Sudden unexpected infant death (SUID)
3.1.2	Added Pulseless electrical activity (Critical)
4.2	Changed Decubitus Ulcer to Ulcerative Lesions
4.2.1	Added Decubitus (Emergent, Lower)
4.2.2	Added Venous stasis (Lower)
4.4.2.2	Changed Tinea to Dermatophytes
4.4.3	Changed Parasitic to Ectoparasites (added Lower)
4.4.3.1	Deleted Pediculosis infestation
4.4.3.2	Deleted Scabies
4.4.4.2	Changed Erythema infectiosum to Childhood exanthems (See 10.6.8, 10.6.9)
4.4.4.7	Deleted Warts
5.4.1.3.3	Changed Hyperosmolar coma to Hyperosmolar hyperglycemic state
5.5.3	Added Malabsorption (Emergent, Lower)
5.9.1.1	Added Pheochromocytoma (Critical, Emergent)
6.1.1.2	Changed Spiders to Arachnida
6.1.4	Changed Snakes to Reptiles
7.1.8	Added Perichondritis (Emergent, Lower)
7.2.1.2	Changed Burn confined to eye and adnexa to Burn confined to eye
7.3	Changed Cavernous Sinus Thrombosis to Cerebral Venous Sinus Thrombosis
7.3.1	Added Cavernous sinus thrombosis (Critical, Emergent)
7.5.8	Changed Periapical abscess to Dental abscess

10.6.8	Added (See 4.4.4.2)
10.6.9	Added (See 4.4.4.2)
11.1.1	Changed Aseptic necrosis of hip to Aseptic/Avascular necrosis
11.4.1	Changed Myalgia/Myositis to Myositis
12.3.1	Changed Muscle contraction to Tension
12.3.3	Added Cluster (Emergent, Lower)
12.5.5	Changed Neuralgia/Neuritis to Neuritis
12.6.2	Added Chorea/Choreiform (Lower)
12.6.3	Added Tardive dyskinesia (Lower)
12.9.3.1	Added Nonconvulsive (Critical)
12.11	Changed Stroke (Cerebral Vascular Events) to Stroke
13.1.2.2	Added Urethritis (Lower)
13.1.6.1	Changed Bartholin's abscess to Bartholin's cyst (added Lower)
13.3.6	Changed Pregnancy induced hypertension to Gestational hypertension
13.3.10	Added Gestational diabetes (Emergent, Lower)
13.4.1	Added Assisted reproductive therapies (Critical, Emergent, Lower)
13.8.4	Added Pituitary infarction (Critical, Emergent)
13.9	Added Contraception (Emergent, Lower)
14.1.5	Added Tobacco dependence (Lower)
14.3.1	Changed Drug-seeking behavior to Drug-diversion behavior
14.5.4.4	Deleted Phencyclidine
14.5.4.6	Added Anticholinergic (See 17.1.4) (Critical, Emergent, Lower)
15.4.3	Deleted Urinary tract infection (UTI)
15.5.4.4	Changed Torsion of testis to Torsion
16.1.1.3	Deleted Pertussis
16.1.1.4	Deleted Upper respiratory infection
16.2.6.3	Added Open (Critical)
16.6.3	Added Fat emboli (Critical, Emergent)
16.7.4	Added Respiratory syncytial virus (RSV) (Critical, Emergent, Lower)

17.1.4 Added (See 14.5.4.7)  17.1.5 Changed Anticoagulants to Anticoagulants/Antithrombotics  17.1.41 Added Antibiotics (Emergent, Lower)  17.1.42 Added Antiretrovirals (Emergent, Lower)  18.1.2.7.3 Added Open (Critical)  18.1.4.5 Added Nasal (Lower)  18.1.4.5.1 Added Septal hematoma (Emergent)  18.1.4.6.1 Added Zygomatic arch (Lower)  18.1.5.5 Added Urethral (Emergent, Lower)  18.1.8 Changed Lower extremity bony trauma to Extremity bony trauma  18.1.9.4 Added Strangulation (Critical, Emergent, Lower)  18.1.10.4 Added Salter-Harris classification (Emergent, Lower)  18.1.1.1.1 Deleted Knee  18.1.1.4.1 Deleted Penetrating  18.1.1.5 Changed Penetrating soft tissue to Penetrating trauma  18.1.1.6 Deleted Dislocations/Subluxations  18.1.1.6.1 Deleted Dislocations/Subluxations  18.1.1.6.2 Added (See 19.4.8.2)  19.3.1 Changed Local to Local anesthesia  19.4.4.8 Added Corneal foreign body removal (See 18.1.10.4)  19.4.9 Added Drainage of hematoma  19.4.6.6 Added Fasciotomy  19.4.8.2 Added (See 18.2.2)  19.5.2 Changed Forensic examination to Collection and handling of forensic material  20.2.4 Added Principles of quality improvement  20.4.1.1 Changed Computerized physician order entry to Computerized order entry	16.7.5	Added Pertussis (Critical, Emergent, Lower)
17.1.41 Added Antibiotics (Emergent, Lower) 17.1.42 Added Antiretrovirals (Emergent, Lower) 18.1.2.7.3 Added Open (Critical) 18.1.4.5 Added Nasal (Lower) 18.1.4.5.1 Added Septal hematoma (Emergent) 18.1.4.6 Added Zygomatic arch (Lower) 18.1.5.5 Added Urethral (Emergent, Lower) 18.1.8 Changed Lower extremity bony trauma to Extremity bony trauma 18.1.9.4 Added Strangulation (Critical, Emergent, Lower) 18.1.10.4 Added (See 19.4.4.8) 18.1.12.1.1 Added Salter-Harris classification (Emergent, Lower) 18.1.14.4.1 Deleted Knee 18.1.14.4.2 Deleted Penetrating 18.1.16.5 Changed Penetrating soft tissue to Penetrating trauma 18.1.16.1 Deleted Upper extremity bony trauma 18.1.16.1 Deleted Dislocations/Subluxations 18.1.16.2 Deleted Fractures (open and closed) 18.2.2 Added (See 19.4.8.2) 19.3.1 Changed Local to Local anesthesia 19.4.4.8 Added Corneal foreign body removal (See 18.1.10.4) 19.4.4.9 Added Paninage of hematoma 19.4.6.6 Added Fasciotomy 19.4.8.2 Added (See 18.2.2) 19.5.2 Changed Forensic examination to Collection and handling of forensic material 20.2.4 Added Principles of quality improvement	17.1.4	Added (See 14.5.4.7)
17.1.42 Added Antiretrovirals (Emergent, Lower)  18.1.2.7.3 Added Open (Critical)  18.1.4.5 Added Nasal (Lower)  18.1.4.5.1 Added Septal hematoma (Emergent)  18.1.4.6 Added Zygomatic arch (Lower)  18.1.5.5 Added Urethral (Emergent, Lower)  18.1.8 Changed Lower extremity bony trauma to Extremity bony trauma  18.1.9.4 Added Strangulation (Critical, Emergent, Lower)  18.1.10.4 Added (See 19.4.4.8)  18.1.12.1.1 Added Salter-Harris classification (Emergent, Lower)  18.1.14.4.1 Deleted Knee  18.1.14.5 Changed Penetrating  18.1.16. Deleted Upper extremity bony trauma  18.1.16. Deleted Upper extremity bony trauma  18.1.16.1 Deleted Dislocations/Subluxations  18.1.16.2 Deleted Fractures (open and closed)  18.2.2 Added (See 19.4.8.2)  19.3.1 Changed Local to Local anesthesia  19.4.4.8 Added Corneal foreign body removal (See 18.1.10.4)  19.4.4.9 Added Pasciotomy  19.4.8.2 Added (See 18.2.2)  19.5.2 Changed Forensic examination to Collection and handling of forensic material  20.2.4 Added Principles of quality improvement	17.1.5	Changed Anticoagulants to Anticoagulants/Antithrombotics
18.1.2.7.3 Added Open (Critical) 18.1.4.5.1 Added Nasal (Lower) 18.1.4.5.1 Added Septal hematoma (Emergent) 18.1.4.6. Added Zygomatic arch (Lower) 18.1.5.5 Added Urethral (Emergent, Lower) 18.1.8 Changed Lower extremity bony trauma to Extremity bony trauma 18.1.9.4 Added Strangulation (Critical, Emergent, Lower) 18.1.10.4 Added (See 19.4.4.8) 18.1.10.4 Added Salter-Harris classification (Emergent, Lower) 18.1.14.4.1 Deleted Knee 18.1.14.4.2 Deleted Penetrating 18.1.14.5 Changed Penetrating soft tissue to Penetrating trauma 18.1.16 Deleted Upper extremity bony trauma 18.1.16.1 Deleted Dislocations/Subluxations 18.1.16.2 Deleted Fractures (open and closed) 18.2.2 Added (See 19.4.8.2) 19.3.1 Changed Local to Local anesthesia 19.4.4.8 Added Corneal foreign body removal (See 18.1.10.4) 19.4.4.9 Added Prainage of hematoma 19.4.6.6 Added Fasciotomy 19.4.8.2 Added (See 18.2.2) 19.5.2 Changed Forensic examination to Collection and handling of forensic material 20.2.4 Added Principles of quality improvement	17.1.41	Added Antibiotics (Emergent, Lower)
18.1.4.5 Added Nasal (Lower)  18.1.4.5.1 Added Septal hematoma (Emergent)  18.1.4.6 Added Zygomatic arch (Lower)  18.1.5.5 Added Urethral (Emergent, Lower)  18.1.8 Changed Lower extremity bony trauma to Extremity bony trauma  18.1.9.4 Added Strangulation (Critical, Emergent, Lower)  18.1.10.4 Added (See 19.4.4.8)  18.1.12.1.1 Added Salter-Harris classification (Emergent, Lower)  18.1.14.4.1 Deleted Knee  18.1.14.4.2 Deleted Penetrating  18.1.14.5 Changed Penetrating soft tissue to Penetrating trauma  18.1.16 Deleted Upper extremity bony trauma  18.1.16.1 Deleted Dislocations/Subluxations  18.1.16.2 Deleted Fractures (open and closed)  18.2.2 Added (See 19.4.8.2)  19.3.1 Changed Local to Local anesthesia  19.4.4.8 Added Corneal foreign body removal (See 18.1.10.4)  19.4.9 Added Prainage of hematoma  19.4.6 Added Fasciotomy  19.4.8.2 Added (See 18.2.2)  19.5.2 Changed Forensic examination to Collection and handling of forensic material  20.2.4 Added Principles of quality improvement	17.1.42	Added Antiretrovirals (Emergent, Lower)
18.1.4.5.1 Added Septal hematoma (Emergent) 18.1.4.6 Added Zygomatic arch (Lower) 18.1.5.5 Added Urethral (Emergent, Lower) 18.1.8 Changed Lower extremity bony trauma to Extremity bony trauma 18.1.9.4 Added Strangulation (Critical, Emergent, Lower) 18.1.10.4 Added (See 19.4.4.8) 18.1.12.1.1 Added Salter-Harris classification (Emergent, Lower) 18.1.14.4.1 Deleted Knee 18.1.14.4.2 Deleted Penetrating 18.1.14.5 Changed Penetrating soft tissue to Penetrating trauma 18.1.16 Deleted Upper extremity bony trauma 18.1.16.1 Deleted Dislocations/Subluxations 18.1.16.2 Deleted Fractures (open and closed) 18.2.2 Added (See 19.4.8.2) 19.3.1 Changed Local to Local anesthesia 19.4.4.8 Added Corneal foreign body removal (See 18.1.10.4) 19.4.4.9 Added Fasciotomy 19.4.8.2 Added (See 18.2.2) 19.5.2 Changed Forensic examination to Collection and handling of forensic material 20.2.4 Added Principles of quality improvement	18.1.2.7.3	Added Open (Critical)
18.1.4.6 Added Zygomatic arch (Lower) 18.1.5.5 Added Urethral (Emergent, Lower) 18.1.8 Changed Lower extremity bony trauma to Extremity bony trauma 18.1.9.4 Added Strangulation (Critical, Emergent, Lower) 18.1.10.4 Added (See 19.4.4.8) 18.1.12.1.1 Added Salter-Harris classification (Emergent, Lower) 18.1.14.4.1 Deleted Knee 18.1.14.4.2 Deleted Penetrating 18.1.14.5 Changed Penetrating soft tissue to Penetrating trauma 18.1.16 Deleted Upper extremity bony trauma 18.1.16.1 Deleted Dislocations/Subluxations 18.1.16.2 Deleted Fractures (open and closed) 18.2.2 Added (See 19.4.8.2) 19.3.1 Changed Local to Local anesthesia 19.4.4.8 Added Corneal foreign body removal (See 18.1.10.4) 19.4.4.9 Added Principles of hematoma 19.4.6.6 Added Fasciotomy 19.4.8.2 Added (See 18.2.2) 19.5.2 Changed Forensic examination to Collection and handling of forensic material 20.2.4 Added Principles of quality improvement	18.1.4.5	Added Nasal (Lower)
18.1.5.5 Added Urethral (Emergent, Lower)  18.1.8 Changed Lower extremity bony trauma to Extremity bony trauma  18.1.9.4 Added Strangulation (Critical, Emergent, Lower)  18.1.10.4 Added (See 19.4.4.8)  18.1.12.1.1 Added Salter-Harris classification (Emergent, Lower)  18.1.14.4.1 Deleted Knee  18.1.14.4.2 Deleted Penetrating  18.1.14.5 Changed Penetrating soft tissue to Penetrating trauma  18.1.16 Deleted Upper extremity bony trauma  18.1.16.1 Deleted Dislocations/Subluxations  18.1.16.2 Deleted Fractures (open and closed)  18.2.2 Added (See 19.4.8.2)  19.3.1 Changed Local to Local anesthesia  19.4.4.8 Added Corneal foreign body removal (See 18.1.10.4)  19.4.9 Added Drainage of hematoma  19.4.6.6 Added Fasciotomy  19.4.8.2 Added (See 18.2.2)  19.5.2 Changed Forensic examination to Collection and handling of forensic material  20.2.4 Added Principles of quality improvement	18.1.4.5.1	Added Septal hematoma (Emergent)
18.1.8 Changed Lower extremity bony trauma to Extremity bony trauma  18.1.9.4 Added Strangulation (Critical, Emergent, Lower)  18.1.10.4 Added (See 19.4.4.8)  18.1.12.1.1 Added Salter-Harris classification (Emergent, Lower)  18.1.14.4.1 Deleted Knee  18.1.14.4.2 Deleted Penetrating  18.1.14.5 Changed Penetrating soft tissue to Penetrating trauma  18.1.16 Deleted Upper extremity bony trauma  18.1.16.1 Deleted Dislocations/Subluxations  18.1.16.2 Deleted Fractures (open and closed)  18.2.2 Added (See 19.4.8.2)  19.3.1 Changed Local to Local anesthesia  19.4.4.8 Added Corneal foreign body removal (See 18.1.10.4)  19.4.9 Added Drainage of hematoma  19.4.6.6 Added Fasciotomy  19.4.8.2 Added (See 18.2.2)  19.5.2 Changed Forensic examination to Collection and handling of forensic material  20.2.4 Added Principles of quality improvement	18.1.4.6	Added Zygomatic arch (Lower)
18.1.9.4 Added Strangulation (Critical, Emergent, Lower)  18.1.10.4 Added (See 19.4.4.8)  18.1.12.1.1 Added Salter-Harris classification (Emergent, Lower)  18.1.14.4.1 Deleted Knee  18.1.14.4.2 Deleted Penetrating  18.1.14.5 Changed Penetrating soft tissue to Penetrating trauma  18.1.16 Deleted Upper extremity bony trauma  18.1.16.1 Deleted Dislocations/Subluxations  18.1.16.2 Deleted Fractures (open and closed)  18.2.2 Added (See 19.4.8.2)  19.3.1 Changed Local to Local anesthesia  19.4.4.8 Added Corneal foreign body removal (See 18.1.10.4)  19.4.4.9 Added Principles of hematoma  19.4.6.6 Added Fasciotomy  19.4.8.2 Added (See 18.2.2)  19.5.2 Changed Forensic examination to Collection and handling of forensic material  20.2.4 Added Principles of quality improvement	18.1.5.5	Added Urethral (Emergent, Lower)
18.1.10.4 Added (See 19.4.4.8)  18.1.12.1.1 Added Salter-Harris classification (Emergent, Lower)  18.1.14.4.1 Deleted Knee  18.1.14.4.2 Deleted Penetrating  18.1.14.5 Changed Penetrating soft tissue to Penetrating trauma  18.1.16 Deleted Upper extremity bony trauma  18.1.16.1 Deleted Dislocations/Subluxations  18.1.16.2 Deleted Fractures (open and closed)  18.2.2 Added (See 19.4.8.2)  19.3.1 Changed Local to Local anesthesia  19.4.4.8 Added Corneal foreign body removal (See 18.1.10.4)  19.4.4.9 Added Principles of hematoma  19.4.6.6 Added Fasciotomy  19.4.8.2 Added (See 18.2.2)  19.5.2 Changed Forensic examination to Collection and handling of forensic material  20.2.4 Added Principles of quality improvement	18.1.8	Changed Lower extremity bony trauma to Extremity bony trauma
18.1.12.1.1 Added Salter-Harris classification (Emergent, Lower)  18.1.14.4.1 Deleted Knee  18.1.14.4.2 Deleted Penetrating  18.1.14.5 Changed Penetrating soft tissue to Penetrating trauma  18.1.16 Deleted Upper extremity bony trauma  18.1.16.1 Deleted Dislocations/Subluxations  18.1.16.2 Deleted Fractures (open and closed)  18.2.2 Added (See 19.4.8.2)  19.3.1 Changed Local to Local anesthesia  19.4.4.8 Added Corneal foreign body removal (See 18.1.10.4)  19.4.4.9 Added Drainage of hematoma  19.4.6.6 Added Fasciotomy  19.4.8.2 Added (See 18.2.2)  19.5.2 Changed Forensic examination to Collection and handling of forensic material  20.2.4 Added Principles of quality improvement	18.1.9.4	Added Strangulation (Critical, Emergent, Lower)
18.1.14.4.1 Deleted Knee  18.1.14.4.2 Deleted Penetrating  18.1.14.5 Changed Penetrating soft tissue to Penetrating trauma  18.1.16 Deleted Upper extremity bony trauma  18.1.16.1 Deleted Dislocations/Subluxations  18.1.16.2 Deleted Fractures (open and closed)  18.2.2 Added (See 19.4.8.2)  19.3.1 Changed Local to Local anesthesia  19.4.4.8 Added Corneal foreign body removal (See 18.1.10.4)  19.4.4.9 Added Drainage of hematoma  19.4.6.6 Added Fasciotomy  19.4.8.2 Added (See 18.2.2)  19.5.2 Changed Forensic examination to Collection and handling of forensic material  20.2.4 Added Principles of quality improvement	18.1.10.4	Added (See 19.4.4.8)
18.1.14.4.2 Deleted Penetrating  18.1.14.5 Changed Penetrating soft tissue to Penetrating trauma  18.1.16 Deleted Upper extremity bony trauma  18.1.16.1 Deleted Dislocations/Subluxations  18.1.16.2 Deleted Fractures (open and closed)  18.2.2 Added (See 19.4.8.2)  19.3.1 Changed Local to Local anesthesia  19.4.4.8 Added Corneal foreign body removal (See 18.1.10.4)  19.4.4.9 Added Drainage of hematoma  19.4.6.6 Added Fasciotomy  19.4.8.2 Added (See 18.2.2)  19.5.2 Changed Forensic examination to Collection and handling of forensic material  20.2.4 Added Principles of quality improvement	18.1.12.1.1	Added Salter-Harris classification (Emergent, Lower)
18.1.14.5 Changed Penetrating soft tissue to Penetrating trauma  18.1.16 Deleted Upper extremity bony trauma  18.1.16.1 Deleted Dislocations/Subluxations  18.1.16.2 Deleted Fractures (open and closed)  18.2.2 Added (See 19.4.8.2)  19.3.1 Changed Local to Local anesthesia  19.4.4.8 Added Corneal foreign body removal (See 18.1.10.4)  19.4.4.9 Added Drainage of hematoma  19.4.6.6 Added Fasciotomy  19.4.8.2 Added (See 18.2.2)  19.5.2 Changed Forensic examination to Collection and handling of forensic material  20.2.4 Added Principles of quality improvement	18.1.14.4.1	Deleted Knee
18.1.16 Deleted Upper extremity bony trauma  18.1.16.1 Deleted Dislocations/Subluxations  18.1.16.2 Deleted Fractures (open and closed)  18.2.2 Added (See 19.4.8.2)  19.3.1 Changed Local to Local anesthesia  19.4.4.8 Added Corneal foreign body removal (See 18.1.10.4)  19.4.6.6 Added Fasciotomy  19.4.8.2 Added (See 18.2.2)  19.5.2 Changed Forensic examination to Collection and handling of forensic material  20.2.4 Added Principles of quality improvement	18.1.14.4.2	Deleted Penetrating
18.1.16.1 Deleted Dislocations/Subluxations  18.1.16.2 Deleted Fractures (open and closed)  18.2.2 Added (See 19.4.8.2)  19.3.1 Changed Local to Local anesthesia  19.4.4.8 Added Corneal foreign body removal (See 18.1.10.4)  19.4.4.9 Added Drainage of hematoma  19.4.6.6 Added Fasciotomy  19.4.8.2 Added (See 18.2.2)  19.5.2 Changed Forensic examination to Collection and handling of forensic material  20.2.4 Added Principles of quality improvement	18.1.14.5	Changed Penetrating soft tissue to Penetrating trauma
18.1.16.2 Deleted Fractures (open and closed)  18.2.2 Added (See 19.4.8.2)  19.3.1 Changed Local to Local anesthesia  19.4.4.8 Added Corneal foreign body removal (See 18.1.10.4)  19.4.4.9 Added Drainage of hematoma  19.4.6.6 Added Fasciotomy  19.4.8.2 Added (See 18.2.2)  19.5.2 Changed Forensic examination to Collection and handling of forensic material  20.2.4 Added Principles of quality improvement	18.1.16	Deleted Upper extremity bony trauma
18.2.2 Added (See 19.4.8.2)  19.3.1 Changed Local to Local anesthesia  19.4.4.8 Added Corneal foreign body removal (See 18.1.10.4)  19.4.4.9 Added Drainage of hematoma  19.4.6.6 Added Fasciotomy  19.4.8.2 Added (See 18.2.2)  19.5.2 Changed Forensic examination to Collection and handling of forensic material  20.2.4 Added Principles of quality improvement	18.1.16.1	Deleted Dislocations/Subluxations
19.3.1 Changed Local to Local anesthesia  19.4.4.8 Added Corneal foreign body removal (See 18.1.10.4)  19.4.4.9 Added Drainage of hematoma  19.4.6.6 Added Fasciotomy  19.4.8.2 Added (See 18.2.2)  19.5.2 Changed Forensic examination to Collection and handling of forensic material  20.2.4 Added Principles of quality improvement	18.1.16.2	Deleted Fractures (open and closed)
19.4.4.8 Added Corneal foreign body removal (See 18.1.10.4)  19.4.4.9 Added Drainage of hematoma  19.4.6.6 Added Fasciotomy  19.4.8.2 Added (See 18.2.2)  19.5.2 Changed Forensic examination to Collection and handling of forensic material  20.2.4 Added Principles of quality improvement	18.2.2	Added (See 19.4.8.2)
19.4.4.9 Added Drainage of hematoma  19.4.6.6 Added Fasciotomy  19.4.8.2 Added (See 18.2.2)  19.5.2 Changed Forensic examination to Collection and handling of forensic material  20.2.4 Added Principles of quality improvement	19.3.1	Changed Local to Local anesthesia
19.4.6.6 Added Fasciotomy  19.4.8.2 Added (See 18.2.2)  19.5.2 Changed Forensic examination to Collection and handling of forensic material  20.2.4 Added Principles of quality improvement	19.4.4.8	Added Corneal foreign body removal (See 18.1.10.4)
19.4.8.2 Added (See 18.2.2)  19.5.2 Changed Forensic examination to Collection and handling of forensic material  20.2.4 Added Principles of quality improvement	19.4.4.9	Added Drainage of hematoma
19.5.2 Changed Forensic examination to Collection and handling of forensic material  20.2.4 Added Principles of quality improvement	19.4.6.6	Added Fasciotomy
20.2.4 Added Principles of quality improvement	19.4.8.2	Added (See 18.2.2)
	19.5.2	Changed Forensic examination to Collection and handling of forensic material
20.4.1.1 Changed Computerized physician order entry to Computerized order entry	20.2.4	Added Principles of quality improvement
	20.4.1.1	Changed Computerized physician order entry to Computerized order entry

20.4.4.1	Changed End-of-life and palliative care to End-of-life and palliative care/Advance directives
20.4.4.2	Changed Long-term care to Placement options
20.4.7.1	Added Public policy

#### **Changes to Category 1**

Category 1 in this document reflects all changes to the 2011 Model resulting from the 2013 EM Model Task Force review. For comparison, the 2011 version of Category 1 may be found at Perina DG, Brunett CP, Caro DA, et al; for 2011 EM Model of the Clinical Practice of Emergency Medicine. The 2011 model of the clinical practice of emergency medicine. *Acad Emerg Med.* 2012;19(7):e19-40.

#### **OVERVIEW**

There are multiple components of "The Model of the Clinical Practice of Emergency Medicine." The components of the EM Model are given in two complementary documents: 1) the Matrix; and 2) a listing of Medical Knowledge, Patient Care, and Procedural Skills.

The EM Model is a three-dimensional description of EM clinical practice. The three dimensions are patient acuity, physician tasks, and the listing of medical knowledge, patient care, and procedural skills. All of these dimensions are interrelated and employed concurrently by a physician when providing patient care. The EM physician's initial approach is determined by the acuity of the patient's presentation. While assessing the patient, the physician completes a series of tasks collecting information. Through this process, the physician is able to select the most likely etiology of the patient's problem from the listing of medical knowledge, patient care, and procedural skills. Through continued application of all three components, the physician is able to arrive at the most probable diagnosis and subsequently implement a treatment plan for the patient. Hence, the three dimensions of the EM Model are interrelated and applied concurrently in the practice of EM.

#### **Physician Tasks**

The physician tasks include the range of activities and the dynamic nature of the practice of EM (Table 3). Emergency physicians simultaneously consider multiple factors involved in patient care that may alter the direction of patient management. For example, the approach to the patient can change dramatically when considering a pediatric versus a geriatric presentation of the same complaint, i.e., modifying factors. The physician tasks apply to patients of all ages. Although there are no separate sections on the care of pediatric or geriatric patients, users of the document should consider including pediatric and geriatric aspects of patient care related to each task. When considered together, these tasks are directly related to the six broad competencies expected of board-certified emergency physicians.

#### **Patient Acuity**

An emergency physician's frame of reference in a patient encounter is fundamentally related to the actual, apparent, or potential acuity of the patient's condition. Establishing the acuity level is essential for defining the context for action, the priorities of the patient encounter, and consequently, the order of tasks necessary to manage the patient successfully. In the EM Model, patient acuity includes critical, emergent, and lower acuity (Table 2).

#### **Matrix of Physician Tasks by Patient Acuity**

The Matrix is organized along two principal dimensions: Patient Acuity and Physician Tasks (Table 1). The Matrix represents all possible physician-patient interactions that are determined by patient acuity and the tasks that may be performed during a patient encounter. Patient acuity is fundamental in determining the priority and sequence of tasks necessary to successfully manage the presenting patient. The Matrix represents how an emergency physician modifies the tasks necessary to perform appropriate patient care based on the patient acuity.

Following is a concise example of how patient acuity and physician tasks can be applied to patients presenting with the same complaint of chest pain:

1. A 55-year old hypertensive diabetic male with crushing chest pain, diaphoresis, and a blood pressure of 60 systolic who is clutching his chest.

Acuity Frame: Critical

Implications: Immediate intervention is necessary to manage and stabilize vital functions.

High probability of mortality exists without immediate intervention.

2. A 74-year old female with a history of angina presenting with three-to-five minutes of dull chest pain typical of her angina. She has stable vital signs and her pain is relieved by nitroglycerin.

Acuity Frame: Emergent

Implications: Initiation of monitoring, vascular access, evaluation, and treatment must be

performed quickly. Progression in severity, complications, or morbidity may

occur without immediate treatment.

3. A 12-year old female with non-traumatic sharp chest pain lasting for several days that intensifies with movement of the torso.

Acuity Frame: Lower acuity

Implications: Patient's symptoms should be addressed promptly. However, progression to

major complications would be unlikely.

Table 1. Matrix of physician tasks by patient acuity

	Patient Acuity			
Physician Tasks	Critical	Emergent	Lower Acuity	
Pre-hospital care Emergency stabilization Performance of focused history and physical examination Modifying factors Professional issues Diagnostic studies Diagnosis Therapeutic interventions Pharmacotherapy Observation and reassessment Consultation Disposition Prevention and education Documentation Multiple patient care Team management				

Table 2. Patient acuity definitions

Critical	Emergent	Lower Acuity
Patient presents with symptoms of a life-threatening illness or injury with a high probability of mortality if immediate intervention is not begun to prevent further airway, respiratory, hemodynamic, and/or neurologic instability.	Patient presents with symptoms of an illness or injury that may progress in severity or result in complications with a high probability for morbidity if treatment is not begun quickly.	Patient presents with symptoms of an illness or injury that have a low probability of progression to more serious disease or development of complications.

# Table 3. Physician task definitions

Table 3. Physician ta	Sk delilitions
Pre-hospital care	Participate actively in pre-hospital care; provide direct patient care or on-line or off-line medical direction or interact with pre-hospital medical providers; assimilate information from pre-hospital care into the assessment and management of the patient.
Emergency stabilization	Conduct primary assessment and take appropriate steps to stabilize and treat patients.
Performance of focused history and physical examination	Communicate effectively to interpret and evaluate the patient's symptoms and history; identify pertinent risk factors in the patient's history; provide a focused evaluation; interpret the patient's appearance, vital signs and condition; recognize pertinent physical findings; perform techniques required for conducting the exam.
Modifying factors	Recognize age, gender, ethnicity, barriers to communication, socioeconomic status, underlying disease, and other factors that may affect patient management.
Professional issues	Understand and apply principles of professionalism and ethics pertinent to patient management.
Legal issues	Understand and apply legal concepts pertinent to the practice of EM.
Diagnostic studies	Select and perform the most appropriate diagnostic studies and interpret the results, e.g., electrocardiogram, emergency ultrasound, radiographic and laboratory tests.
Diagnosis	Develop a differential diagnosis and establish the most likely diagnoses in light of the history, physical, interventions, and test results.
Therapeutic interventions	Perform procedures and nonpharmacologic therapies, and counsel.
Pharmacotherapy	Select appropriate pharmacotherapy, recognize pharmacokinetic properties, and anticipate drug interactions and adverse effects.
Observation and reassessment	Evaluate and re-evaluate the effectiveness of a patient's treatment or therapy, including addressing complications and potential errors; monitor, observe, manage, and maintain the stability of one or more patients who are at different stages in their work-ups.
Consultation	Collaborate with physicians and other professionals to help guide optimal management of patients.
Disposition	Arrange for patient admission, discharge (including follow-up plan), observation, or transfer as appropriate, and communicate these arrangements effectively with patients, family, and involved healthcare team members.
Prevention and education	Apply epidemiologic information to patients at risk; conduct patient education; select appropriate disease and injury prevention techniques.
Documentation	Communicate patient care information in a concise and appropriate manner that facilitates quality care and coding.
Multiple patient care	Prioritize and implement the evaluation and management of multiple patients in the emergency department, including handling interruptions and task-switching, in order to provide optimal patient care.
Team management	Coordinate, educate, or supervise members of the patient management team and utilize appropriate hospital resources.
Mass casualty/Disaster management	Understand and apply the principles of disaster and mass casualty management including preparedness, triage, mitigation, response, and recovery.

#### MEDICAL KNOWLEDGE, PATIENT CARE, AND PROCEDURAL SKILLS

As originally developed, the third dimension of the EM Model was called the Listing of Conditions and Components. The listing contained the fundamental conditions for which patients presented to emergency departments, and was based on data collected by the National Center for Health Statistics at the Centers for Disease Control and Prevention (CDC) during 1995-1996. The CDC data were collected from 40,000 emergency department records statistically representative of 90.3 million emergency department visits in metropolitan and non-metropolitan short-stay or general hospitals in all 50 states and the District of Columbia. Frequency of occurrence was a primary factor in determining inclusion in the Listing of Conditions and Components. Frequency of occurrence, however, was not the sole determinant of inclusion, nor was the number of entries pertaining to a single topic representative of importance. The final list was developed by several expert panels of practicing emergency physicians based on three factors: 1) frequency of occurrence; 2) critical nature of patient presentation; and 3) other components of EM practice.

The Listing of Conditions and Components also contained two appendices. Appendix 1 outlined the diagnostic and/or therapeutic procedures and tests considered essential to the clinical practice of Emergency Medicine. Appendix 2 listed the other essential components and core competencies of EM practice.

With each biennial Task Force review, the Listing of Conditions and Components has evolved to maintain consistency with the current clinical practice of EM. In 2011, it was determined that the contents of the two appendices represented core components of EM knowledge, which, when combined with the Listing of Conditions and Components, encompassed the universe of knowledge that all practicing emergency physicians should possess. Consequently, the appendices were incorporated into the body of the document and the entire section was renamed to Medical Knowledge, Patient Care, and Procedural Skills (Table 4). This change strengthened the inherent link between the EM Model and the ACGME six core competencies.

**NOTE:** The listing of Medical Knowledge, Patient Care, and Procedural Skills is not intended to be comprehensive. It is intended to be representative of the most frequent conditions seen, those with the most serious implications for patients presenting to the emergency department, and the core knowledge and skills required to provide safe and effective patient care.

		19.4.2.6	Thoracostomy			
	19.4.3	Cutaneou	*			
		19.4.3.1	Escharotomy			
		19.4.3.2	Incision and drainage			
		19.4.3.3	Trephination, nails			
			Wound closure techniques			
		19.4.3.5				
	19.4.4		r, eye, nose, and throat			

- 19.4.4.1 Control of epistaxis 19.4.4.2 Drainage of peritonsillar abscess 19.4.4.3 Laryngoscopy 19.4.4.4 Lateral canthotomy 19.4.4.5 Slit lamp examination 19.4.4.6 Tonometry 19.4.4.7 Tooth stabilization 19.4.4.8 Corneal foreign body removal (See 18.1.10.4) 19.4.4.9 Drainage of hematoma 19.4.5 Systemic infectious 19.4.5.1 Personal protection (equipment and techniques) 19.4.5.2 Universal precautions and exposure management 19.4.6 Musculoskeletal 19.4.6.1 Arthrocentesis 19.4.6.2 Compartment pressure measurement 19.4.6.3 Fracture/Dislocation immobilization techniques 19.4.6.4 Fracture/Dislocation reduction techniques 19.4.6.5 Spine immobilization techniques 19.4.6.6 Fasciotomy 19.4.7 Nervous system 19.4.7.1 Lumbar puncture 19.4.8 Obstetrics and gynecology 19.4.8.1 Delivery of newborn 19.4.8.2 Perimortem c-section (See 18.2.2) 19.4.8.3 Sexual assault examination 19.4.9 Psychobehavioral 19.4.9.1 Psychiatric screening examination 19.4.9.2 Violent patient management/Restraint 19.4.10 Renal and urogenital 19.4.10.1 Bladder catheterization 19.4.10.1.1 Urethral catheter 19.4.10.1.2 Suprapubic catheter
- 19.5 Other Diagnostic and Therapeutic Procedures

19.4.10.2 Cystourethrogram 19.4.10.3 Testicular detorsion

19.4.11.1 Decontamination

- 19.5.1 Foreign body removal
- 19.5.2 Collection and handling of forensic material
- 19.5.3 Ultrasound

19.4.11 Toxicologic

- 19.5.3.1 Diagnostic
- 19.5.3.2 Procedural

#### 20.0 OTHER CORE COMPETENCIES OF THE PRACTICE OF EMERGENCY MEDICINE

#### 20.1 Interpersonal and Communication Skills

- 20.1.1 Interpersonal skills
  - 20.1.1.1 Inter-departmental and medical staff relations
  - 20.1.1.2 Intra-departmental relations, teamwork, and collaboration skills

20.2

20.3

20.4

	20.1.1.3	Patient and family experience of care				
20.1.2		ication skills				
	20.1.2.1	Complaint management and service recovery				
		Conflict management				
		Crisis resource management				
		Delivering bad news				
		Multicultural approach to the ED patient				
		Negotiation skills				
Practice-based Learning and Improvement						
	Performance improvement and lifelong learning					
		Evidence-based medicine				
		Interpretation of medical literature				
		Knowledge translation				
		Patient safety and medical errors				
	20.2.1.1	Performance evaluation and feedback				
		Research				
20.2.2	.2 Practice guidelines					
	Education					
		Patient and family				
	20.2.3.2	——————————————————————————————————————				
20.2.4	Principles	s of quality improvement				
	-					
	ionalism					
20.3.1	Advocacy					
	20.3.1.1					
		Professional				
20.3.2	Ethical p					
		Conflicts of interest				
		Diversity awareness				
		Electronic communications/Social media				
		Medical ethics				
		ip and management principles				
20.3.4	Well-beir					
		Fatigue and impairment				
		Time management/Organizational skills				
		Work/Life balance				
	20.3.4.4	Work dysphoria (burn-out)				
Systems	s-based Pr	ractice				
20.4.1	Clinical i	nformatics				
	20.4.1.1	Computerized order entry				
		Clinical decision support				
		Electronic health record				
		Health information integration				
20.4.2		nistration				
	20.4.2.1	Contracts and practice models				
	20.4.2.2	Patient flow and throughput				
		2.2.1 Patient triage and classification				
	20.4.	2.2.2 Hospital crowding and diversion				
	20.4.	2.2.3 Observation and rapid treatment units				

	20.4.2.3 Financial principles			
	20.4.2.3.1 Billing and coding			
	20.4.2.3.2 Cost-effective care and resource utilization			
	20.4.2.3.3 Reimbursement issues			
	20.4.2.4 Human resource management			
	20.4.2.4.1 Allied health professionals			
	20.4.2.4.2 Recruitment, credentialing, and orientation			
20.4.3	ED operations			
	20.4.3.1 Policies and procedures			
	20.4.3.2 ED data acquisition and operational metrics			
	20.4.3.3 Safety, security, and violence in the ED			
20.4.4	Health care coordination			
	20.4.4.1 End-of-life and palliative care/Advance directives			
	20.4.4.2 Placement options			
	20.4.4.3 Outpatient services			
20.4.5	Regulatory/Legal			
	20.4.5.1 Accreditation			
	20.4.5.2 Compliance and reporting requirements			
	20.4.5.3 Confidentiality and HIPAA			
	20.4.5.4 Consent, capacity, and refusal of care			
	20.4.5.5 Emergency Medical Treatment and Active Labor Act (EMTALA)			
20.46	20.4.5.6 External quality metrics			
20.4.6	Risk management			
	20.4.6.1 Liability and litigation			
	20.4.6.2 Professional liability insurance			
20.47	20.4.6.3 Risk mitigation			
20.4.7	Evolving trends in health care delivery			
20.40	20.4.7.1 Public policy			
20.4.8	Regionalization of emergency care			

The following individuals also made contributions to the 2013 EM Model:

American Board of Emergency Medicine Susan K. Adsit Kelly R. Johnston Karen J. Shannon Earl J. Reisdorff, M.D.

American College of Emergency Physicians Marjorie A. Geist, Ph.D., R.N.
